The Selling Book of the MIRRO Store

THIS book is more than a catalog. It is a *selling book*. It is designed to help you sell more MIRRO Aluminum.

It is planned to aid you in making your store *the* MIRRO Store of your neighborhood or community.

It is part of a program which includes fine store display material of many kinds—a program which makes it easy for any MIRRO dealer to attract to himself the consumer demand and acceptance created by the national advertising of MIRRO, which has been going on steadily, year after year, for many years.

The MIRRO line, as this book demonstrates, is very complete. It consists of so many hundreds of items that only the largest stores could carry them all.

All of these items, however, meet a large popular demand, or MIRRO would not make them. There is not one of them which is not selling briskly for many dealers.

Yet many, you will agree, are articles which the average dealer, with his mind on staple tea kettles and sauce pans, would scarcely think of ordering.

New Articles Create New Business

That is one of the reasons why this book will prove valuable to you. It shows you many articles, new to your store, which will enable you to increase your sales of "The Finest Aluminum" and, at the same time, serve your customers more completely.

Take a tour of investigation through the eighty catalog pages which this book contains. Pick out some of the articles which you are not now selling—articles which any woman would be attracted by if they were brought to her attention.

Show the book to some of your best customers and note what they find novel and interesting. Let your clerks look for new items which they think *they* can sell.

Then decide that, in addition to carrying a representative selection of staple MIRRO articles, you will *add some of the less common ones*. Then watch these items sell! Watch them arouse in customers the desire for articles they did not know they needed. Watch them stimulate new selling enthusiasm in your sales people.

To Sell MIRRO Quality, Too

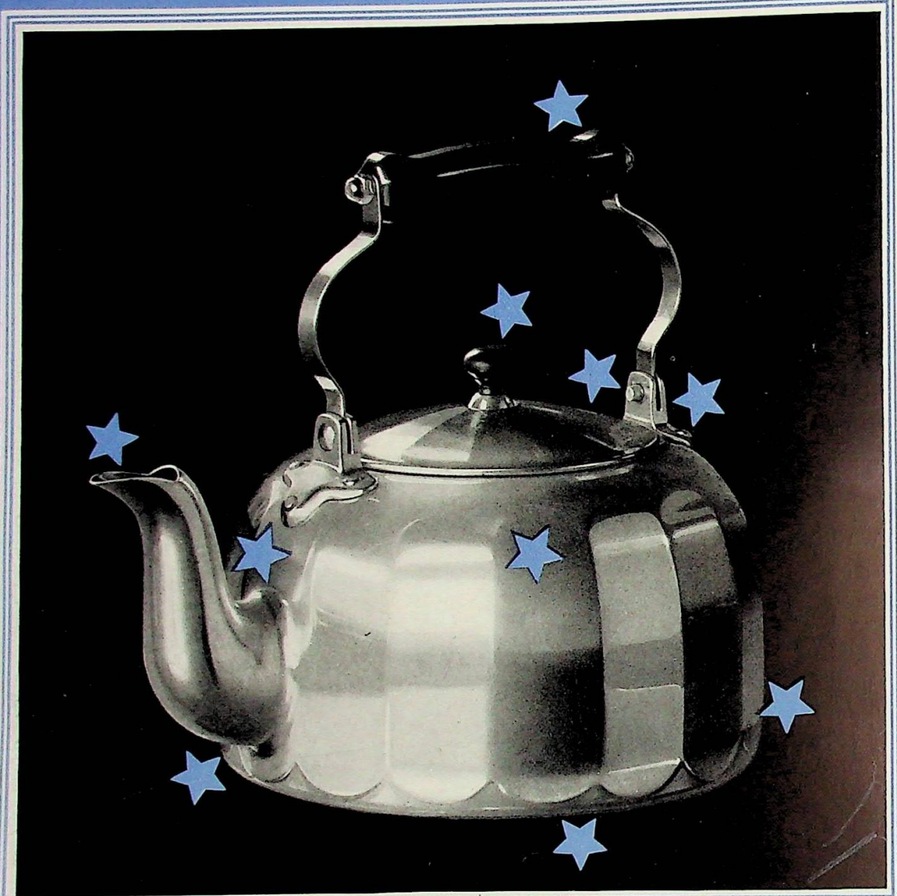
There is another thing which this book will do for you. It will help you to sell the basic value in MIRRO utensils which makes them so economical to own.

MIRRO is not high priced. It is simply *high "qualitied."* But women have been so confused by the low *first* cost of cheap, thin aluminum ware that they are apt to lose sight of the fact that real quality at a necessarily higher price to start with, means real economy in the long run.

This Selling Book tells the story of MIRRO quality. It shows what that quality consists of; where to look for it; how to recognize it. It is a real textbook for sales people in your store. It will enable them to *see* the value in MIRRO and, in consequence, to talk it more enthusiastically and effectively —and increase their sales and earnings.

Further, this book is one in which customers will be interested. Let *them* see why MIRRO is the most economical ware to own.

It is *your* Selling Book for *your* MIRRO Store. Keep it out, in plain sight, and let it work for you every day to increase your sales and profits.



Star-Points of a Fine Tea Kettle

READ in the stars the solid worth and faithful serviceableness of a *typical* MIRRO utensil. These stars show why MIRRO lasts longer and costs less by the year. . . . In this fine tea kettle note especially the beauty of the paneled Colonial design; the thickness of metal to give longest wear; the smooth, perfect welding of the spout, inside as well as out; the spout's wide mouth for convenience in filling; and the handsome ebonized grip, firmly locked so it cannot turn.

PATENT OFFICE
DEC 22 1948
SIGN DIVISION

Star-Points of a Fine Roaster

ANOTHER admirable MIRRO article—needed in every home, even where there is already an oval or oblong one. It is ideal for small roasts and many other uses besides; for meat loaves, pot roasts, soups, steamed breads, puddings, corn-on-the-cob, etc. Observe again the signs of good workmanship and design—the durable thickness of metal; the firmly riveted handles; the strong beads, tightly rolled and sanitary; the tray with wide cut-outs for easy basting; and the hard, polished surface which makes cleaning easy.

Star-Points of a Fine Double Boiler

ONE of the busiest utensils in the kitchen, the double boiler, deserves to be made the MIRRO way. This MIRRO double boiler is most strongly and sturdily built. The inset fits snugly. The cover fits both vessels accurately. The handles are hollow for coolness, with thumb grips for secure handling. The base is wide to save fuel; the bottom vessel of generous capacity to lessen the chance of boiling dry. . . . It is such perfection in every detail which makes all MIRRO utensils so uncommonly satisfactory.

Star-Points of a Fine Sauce Pan

AGAIN you see, in this good sauce pan, the qualities which account for MIRRO serviceableness and economy—the hard, thick metal; the big, solid rivets; the strong, tightly rolled rims. You see, too, the features of design which make it a pleasure to use MIRRO—such as the cool, hollow, thumb-grip handle; and the deeply inset cover which lessens the chance of boiling over. . . . These are the things which insure to the MIRRO purchaser the *satisfaction* of owning the best and the *economy* of lowest cost in the long run.

26 B & S GAUGE = .016 INCHES THICK
22 B & S GAUGE = .025 INCHES THICK
16 B & S GAUGE = .051 INCHES THICK
[AVERAGE THICKNESS OF MIRRO UTENSILS]

MIRRO means thick, hard metal

On this page and those following you will see *inside reasons* why MIRRO utensils are actually cheaper in the long run than ordinary ware that costs much less at first.

★ ★ ★

For example, there is the *thicker gauge* of MIRRO utensils. The average MIRRO utensil is made of 16 B. & S. gauge aluminum, as shown in the illustration. Note that this is double the thickness found in ordinary utensils (22 B. & S. gauge), and three times that of cheap ware (26 B. & S. gauge).

★ ★ ★

Also, MIRRO utensils are made of extra hard, tough, close-grained aluminum, the result of rolling and cross-rolling under eight tons' pressure. These two qualities—thickness and hardness—make MIRRO utensils wear long, hold their shape, and resist denting, scratching, warping and burning.

PATENT OFFICE
DEC 22 1948
DESIGN DIVISION

Uniform thickness insures even wear

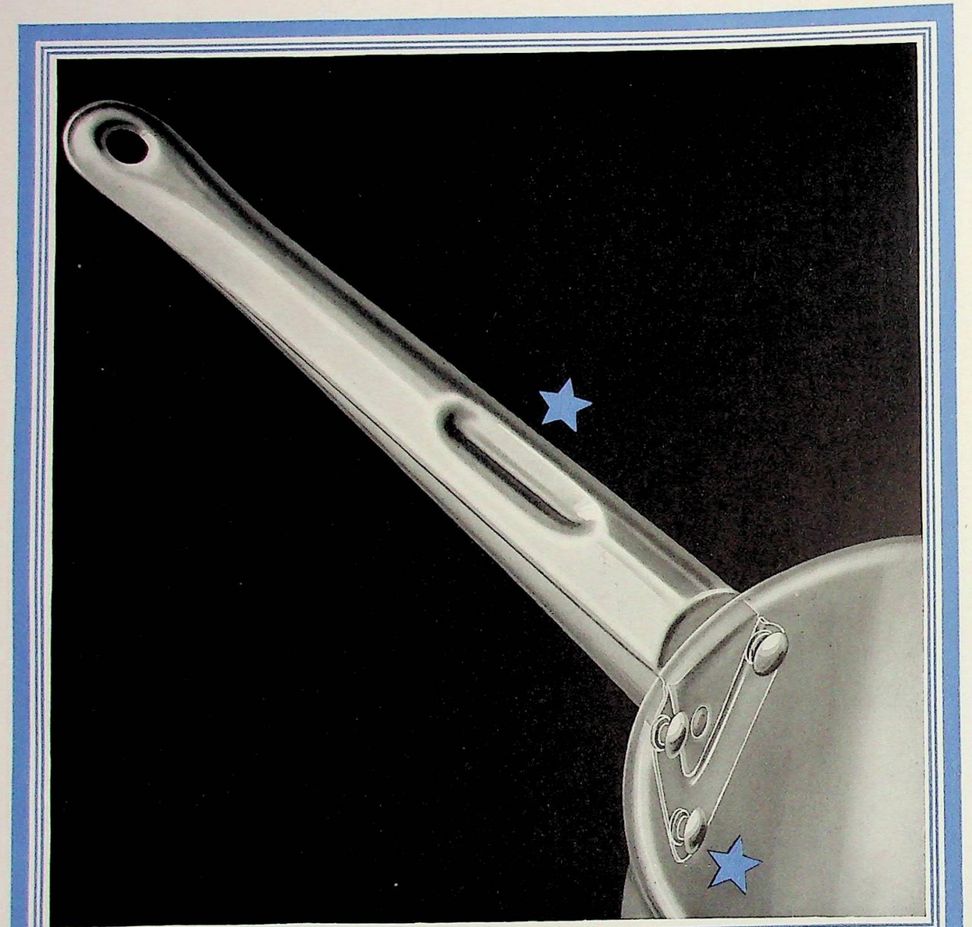
If you could cut through a MIRRO utensil in the way the picture shows, you would be surprised at the uniform thickness of the metal at every point. This evenness eliminates the weak spots which are common in cheaper ware.

★ ★ ★

To secure this uniformity requires the most costly dies and many extra operations, but the added effort is more than justified by the long life for which MIRRO utensils are noted.

★ ★ ★

The illustration reveals another point of MIRRO quality—the raised bottom found in many MIRRO utensils. This feature tends to prevent warping and bulging, and permits the utensil to sit solidly upon the stove.



Super-fine handles, solidly attached

Examine the steel handles of MIRRO utensils and you will know one more of the reasons why MIRRO is called "The Finest Aluminum."

★ ★ ★

Take this sauce pan handle as an example. It is big and substantial to give the hand a good solid grip. It is hollow for maximum coolness. It has a thumb hold for better leverage and greater safety in pouring. It is heavily tinned to prevent rusting.

★ ★ ★

Now see how sturdily it is attached. The big, substantial rivets are on the job to stay; and the wide spacing between rivets distributes the strain and helps to prevent loosening.

Study the ears and bails

Every detail of MIRRO construction repays close study. Note the ears of this preserving kettle; they are made of strong, high-grade steel, and you can see for yourself how heavily they are tinned to prevent rusting.

★ ★ ★

The ears are correctly designed to hold the bail vertical or horizontal, while permitting free motion from one position to another, without the sticking which is such an annoyance with cheap utensils.

★ ★ ★

MIRRO bails are made of heavy steel wire, heavily tinned. The handles are of seasoned, kiln-dried wood, covered with a thick coating of oven-baked enamel. The notched ears hold the handle away from the side of the kettle, keeping it cool and preventing charring.

Rivetless, no-burn knobs

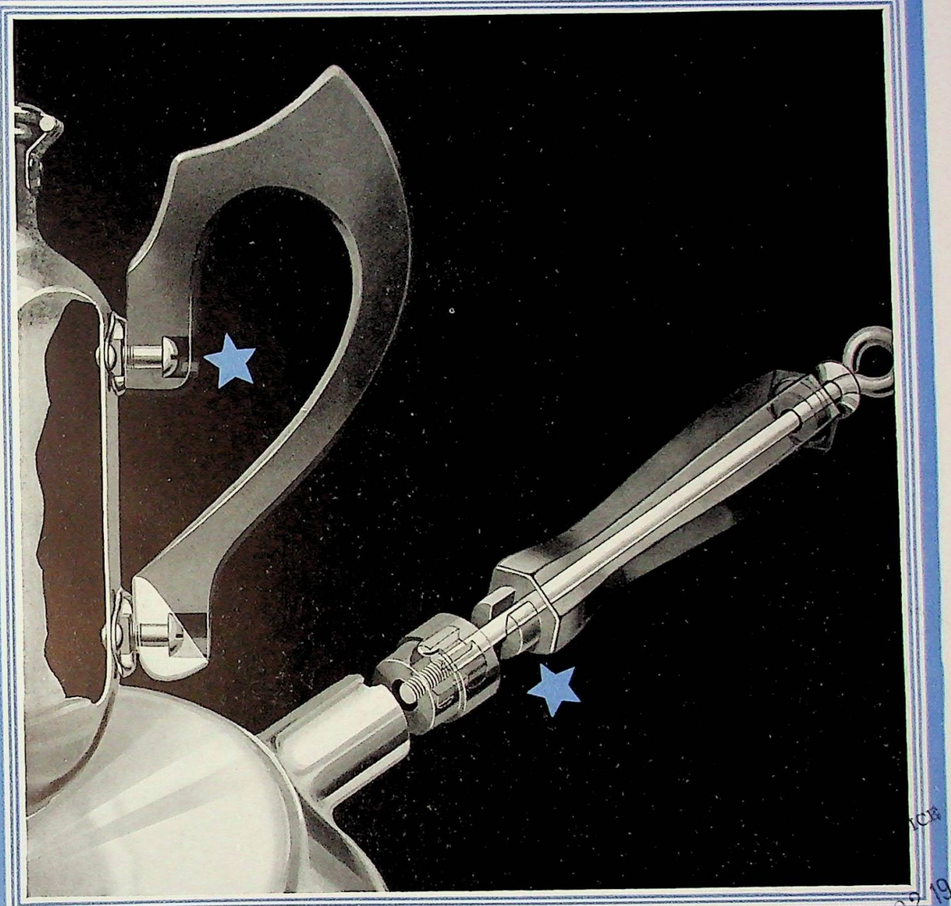
An important feature of MIRRO utensils is their rivetless, no-burn knobs. Notice how they are securely attached with a metal ferrule at the base, with no rivet protruding at the top to burn the hand.

★ ★ ★

MIRRO knobs are made of selected, seasoned wood covered with a thick coating of oven-baked enamel. They will not split or pull out.

★ ★ ★

This picture also illustrates another valuable MIRRO feature—the *inset* cover which prevents boiling over. When the steam pressure lifts this cover the liquid is still below the top of the vessel and is less likely to overflow.



DEC 22 1948
DESIGN DIVISION

More handle quality

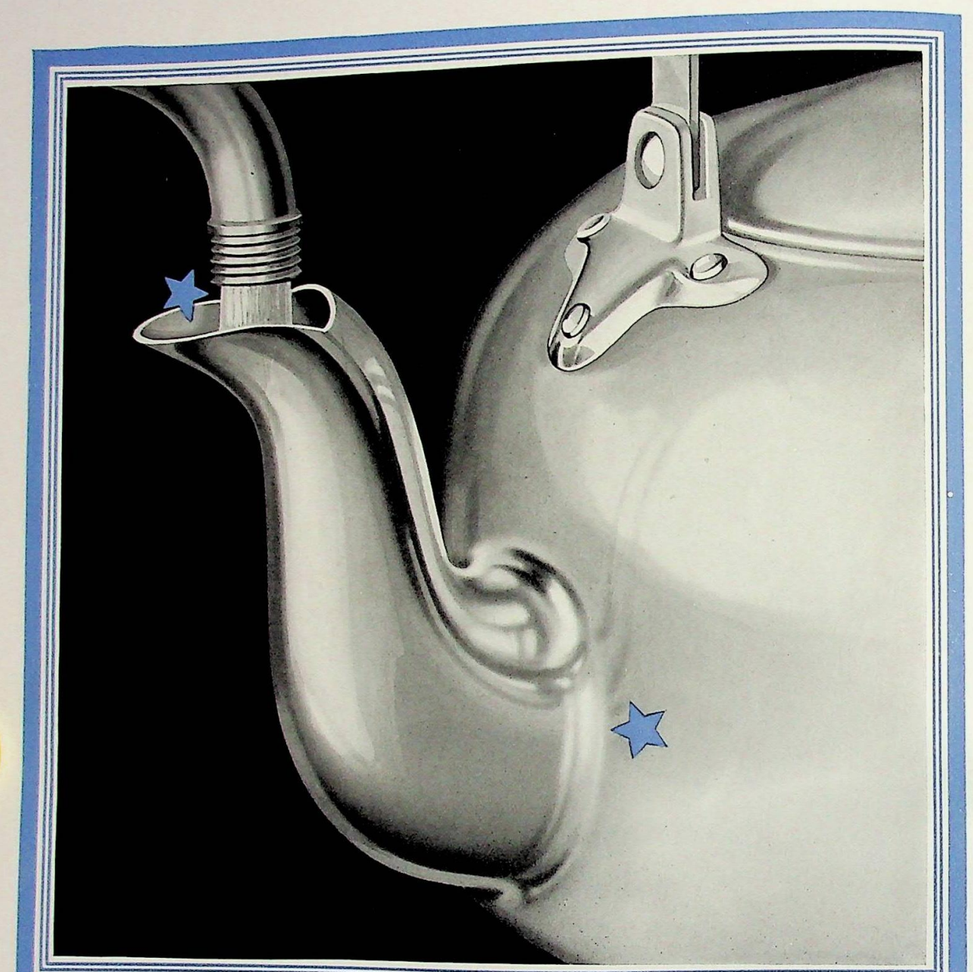
Replaceable handles of kiln-dried, seasoned wood covered with a thick coating of oven-baked enamel are features of many MIRRO utensils. A flame guard protects the handle when necessary. Replacement is merely a matter of a minute's work with a screw driver.

★ ★ ★

The beautiful MIRRO Cold Water Percolator (No. 5572-M) has a graceful handle of special non-burning composition.

★ ★ ★

MIRRO fry pans and griddles have an exclusive, patented *insulating sleeve* between the aluminum handle socket and the wood handle. Socket, insulator, and handle *lock together*, so that the handle can not slip or turn in the hand—an invaluable safety feature. The octagon shape further insures a firm grip.



MIRRO welds are strong-points

If you want to see a perfect job of aluminum welding examine the spout of, say, a MIRRO tea kettle. Look inside as well as outside and see how the spout has actually become a part of the kettle.

★ ★ ★

MIRRO welds leave no objectionable joints or cracks, and are so strong that the spout of the MIRRO tea kettle will hold up the weight of a man without bending or breaking.

★ ★ ★

Observe in the illustration the wide mouth of the spout. This is designed to permit refilling the kettle *through the spout* without the risk of burning the hand when the cover is removed for filling.

Wide bottoms for fuel economy

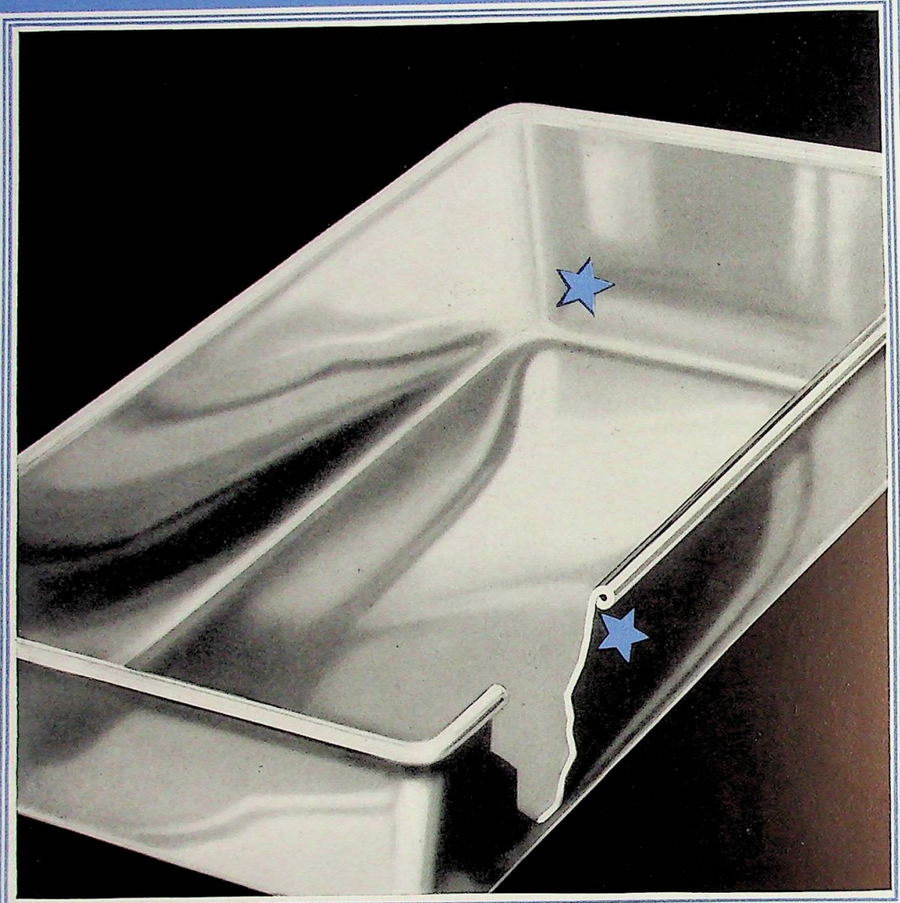
MIRRO utensils are designed by experts who understand the importance of efficiency and economy in the kitchen. Note, for example, the wide bottom of the MIRRO tea kettle. This keeps the heat where it belongs and prevents waste of fuel.

★ ★ ★

MIRRO utensils are remarkable heat-conductors. They get uniformly hot all over—a desirable quality, as it reduces the danger of food burning or sticking, and makes constant stirring unnecessary.

★ ★ ★

The illustration shows the fine handle of the MIRRO tea kettle. The flat tinned-steel bail is a valuable feature; it holds the kettle steady when tilted. The ebonized wood grip can not turn in the hand—another factor of safety.



Seamless, sanitary construction

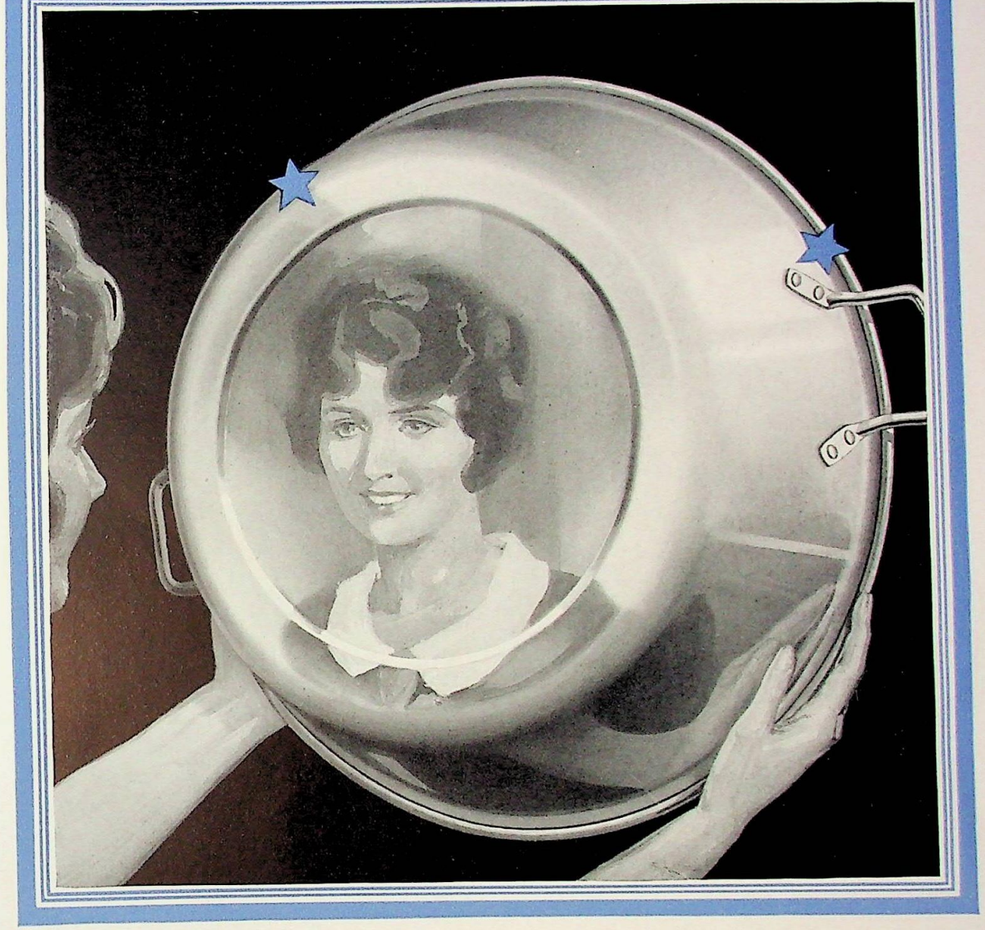
Starting with a flat sheet of aluminum, giant presses gradually draw the metal into the shape required for each MIRRO utensil. Thus there are no dirt-catching seams, folds, or joints in MIRRO.

★ ★ ★

Careful designing insures smoothly rounded corners, as illustrated by the MIRRO cake pan above. These corners not only make cleaning easier, but also facilitate the removal of bread, cake, etc., without damage.

★ ★ ★

MIRRO beads (or rims) are especially strong, giving the vessel sturdiness and rigidity. They are tightly rolled to leave no lodging place for food.



Shining like a mirror

MIRRO is well named. The smooth, hard aluminum of which MIRRO utensils are made takes an exceptionally brilliant polish which reflects beauty and gives the kitchen a cheery, spick-and-span air.

★ ★ ★

MIRRO polish is more than skin deep, for the metal is so dense and close-grained that it remains smooth and bright after years of use. MIRRO utensils do not scratch or dent readily. They are easier to clean, for food is less apt to stick to them.

★ ★ ★

A detail of the dish pan is worth mentioning. Note the handles. They are *double-riveted*. And they are built to give a comfortable grip with plenty of knuckle-room.

Beauty and Completeness

MIRRO is a joy to own. It has a beauty which almost suggests sterling silver—a beauty which grows more mellow as the years of faithful service lengthen. MIRRO beauty lasts because MIRRO utensils last.

★ ★ ★

The artistic quality of MIRRO designs gives added charm to this ware. Specially notable are the handsome Colonial patterns, with their graceful panels reflecting changing lights and shadows.

★ ★ ★

One of the pleasantest things about MIRRO ownership is that the MIRRO line is very complete—comprising hundreds of different articles. One may have an *all-Mirro kitchen* and enjoy MIRRO beauty and utility to the full.

The MIRRO guaranty

This distinguished mark—"MIRRO, The Finest Aluminum"—is placed only upon the finest products of the world's largest manufacturers of aluminum ware.

★ ★ ★

It is the purchaser's assurance of genuine MIRRO quality and of the satisfaction and economy which that quality unfailingly brings. When MIRRO gifts are given, this mark tells the recipient that nothing less than the best was thought good enough. And, in a more practical sense, it means that the utensil bearing it is covered by the MIRRO Guaranty, which reads:—

★ ★ ★

"*Every* MIRRO *article is designed to serve a definite household need. It is built to give absolute satisfaction. It is guaranteed free from defects in material, construction and workmanship.*"

Tea Kettle

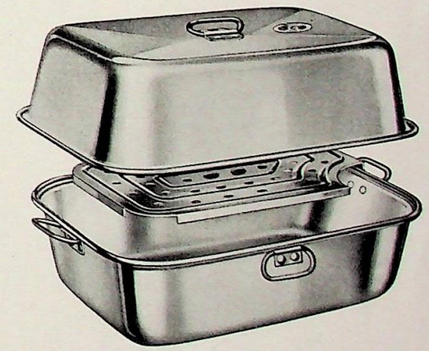
5460-M (Tray)	16 18	7	7 x12¾ 7¾x 9½	One in a carton; half dozen in a shipping container. 21 lbs.

Polish finish; inside Sun-ray finish. Tray bright natural finish. Sturdy, rust-proof handles. Sturdy rivets. Self-basting cover has steam vent. Imprinted Mirro, with Mirro booklet attached.



Oblong Roaster with Tray

No.	B. & S. Gauge	Dim. In.	Depth In.	Packing and Approximate Shipping Wt.
5363-M (Upper Pan)	16	10⅞x15½	4⅛	One in a corrugated container; half dozen in a shipping container. 32½ lbs.
(Lower Pan)	16	11¼x15⅞	4¼	
(Tray)	18	8¼x12¾		" 39½ lbs.
5364-M (Upper Pan)	16	11¾x16⅝	4⅜	
(Lower Pan)	16	12½x17	4½	
(Tray)	18	9¼x14		

Polish finish; tray bright natural finish. Conveniently placed steam vent. Sturdy, rust-proof handles. Handles on lower pan are arranged that one always faces oven door. Sturdy rivets. Imprinted Mirro, with Mirro booklet attached.

Lipped Cooking and Preserving Kettle

No.	B. & S. Gauge	Cap. Qts.	Diam. Top In.	Packing and Approximate Shipping Wt.
444-M	16	4	9⅛	One dozen in a shipping container. 177/8 lbs.
446-M	16	6	10	" 24½ lbs.
448-M	16	8	11	Half dozen in a shipping container. 15 lbs.
450-M	16	10	12⅛	" 17 lbs.
452-M	16	12	13⅛	" 20½ lbs.
454-M	16	14	13¾	" 24½ lbs.
456-M	16	16	14¼	" 27 lbs.
460-M	16	20	15⅜	" 36 lbs.

Polish finish; inside Sun-ray finish. Bail rest ears. Tilting handle with hole for hanging. Sturdy rivets. Imprinted Mirro, with Mirro booklet attached.

See page 32 for covers to fit.

Convex Kettle

No.	B. & S. Gauge	Cap. Qts.	Diam. Top In.	Packing and Approximate Shipping Wt.
253-M	16	3	7⅞	One in a carton; one dozen in a shipping container. 20½ lbs.
254-M	16	4	8⅝	" 23½ lbs.
256-M	16	6	10	" 30 lbs.
258-M	16	8	10⅞	One in a carton; half dozen in a shipping container. 18½ lbs.
260-M	16	10	11½	" 20½ lbs.
262-M	16	12	12	" 23 lbs.

Polish finish; inside Sun-ray finish. Rivetless, cool, ebonized, wood knob. Inset cover prevents boiling over. Bail rest ears. Tilting handle with hole for hanging. Sturdy rivets. Bead upturned on cover. Imprinted Mirro, with Mirro booklet attached.

Convex Sauce Pot

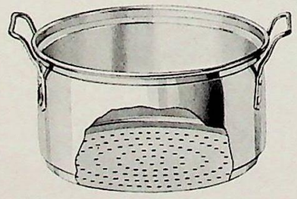
No.	B. & S. Gauge	Cap. Qts.	Diam. Top In.	Packing and Approximate Shipping Wt.
512-M	16	2	7	One in a carton; one dozen in a shipping container. 16 lbs.
513-M	16	3	7⅞	" 19 lbs.
514-M	16	4	8⅝	" 22 lbs.
516-M	16	6	10	" 29½ lbs.
518-M	16	8	10⅞	One in a carton; half dozen in a shipping container. 17½ lbs.
520-M	16	10	11½	" 19½ lbs.
522-M	16	12	12	" 23 lbs.

Polish finish; inside Sun-ray finish. Rivetless, cool, ebonized, wood knob. Inset cover prevents boiling over. Double riveted, sturdy, rust-proof handles. Bead upturned on cover. Sturdy rivets. Imprinted Mirro, with Mirro booklet attached.

Convex Steamer

No.	B. & S. Gauge	Cap. Qts.	Diam. Top In.	Packing and Approximate Shipping Wt.
5536-M (Steamer Section)	18	6	9⅞	One section in a carton; half dozen complete in a shipping container. 28 lbs.
(Sauce Pot)	16	6	10	

Polish finish; inside Sun-ray finish. Rivetless, cool, ebonized, wood knob. Inset cover prevents boiling over. Double riveted, sturdy rust-proof handles. Bead upturned on cover. Sturdy rivets. Cover fits either steamer section or sauce pot. Additional No. 5826-M steamer sections can be added. Pot and steamer imprinted Mirro, with Mirro booklet attached.

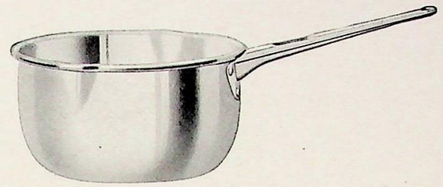


Steamer Section

No.	B. & S. Gauge	Cap. Qts.	Diam. Top In.	Packing and Approximate Shipping Wt.
5826-M	18	6	9⅞	One in a carton; one dozen in a shipping container. 25 lbs.

Will fit No. 516-M Convex Sauce Pot.
Will fit No. 5536-M Convex Steamer.

Polish finish; inside Sun-ray finish. Double riveted, sturdy, rust-proof handles. Sturdy rivets. Imprinted Mirro, with Mirro booklet attached.



Lipped Sauce Pan

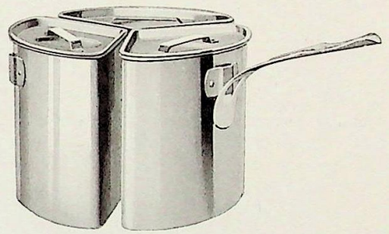
No.	B. & S. Gauge	Cap. Qts.	Diam. Top In.	Packing
5520½-M	16	½	5⅛	In bulk.
5521-M	16	1	5⅞	"
5521½-M	16	1½	6⅛	"
5522-M	16	2	7¼	"
5522½-M	16	2½	8	"
5523-M	16	3	8⅛	"
5524-M	16	4	8⅞	"
5525-M	16	5	9⅝	"

Polish finish; inside Sun-ray finish. Double lipped. Cool, hollow, thumb-grip, rust-proof handle. Sturdy rivets. Imprinted Mirro, with Mirro booklet attached.

Convex Sauce Pan

No.	B. & S. Gauge	Cap. Qts.	Diam. Top In.	Packing and Approximate Shipping Wt.
421-M	16	1	5⅝	One dozen in a shipping container. 9 lbs.
422-M	16	2	7	" 12 lbs.
423-M	16	3	7⅞	" 17½ lbs.
424-M	16	4	8⅝	" 19½ lbs.
426-M	16	6	10	" 27 lbs.

Polish finish; inside Sun-ray finish. Rivetless, cool, ebonized, wood knob. Inset cover prevents boiling over. Cool, hollow, thumb-grip, rust-proof handle. Sturdy rivets. Bead upturned on cover. Imprinted Mirro, with Mirro booklet attached.



Triplicate Sauce Pan Set

No.	B. & S. Gauge	Cap. Qts.	Depth In.	Packing and Approximate Shipping Wt.
5500-M (Each Pan)	19	2	6⅜	One set in a carton; one dozen sets in a shipping container. 36½ lbs.

Bright natural finish. Will fit into any receptacle 9¾" in diameter. Sturdy, rust-proof, detachable handle which fits all three parts. Sturdy rivets. Each pan imprinted Mirro, with Mirro booklet attached.

Triplicate Sauce Pan Set
With Cover Clamps

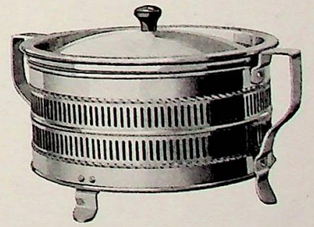
No.	B. & S. Gauge	Cap. Qts.	Depth In.	Packing and Approximate Shipping Wt.
5501-M (Each Pan)	19	2	6⅜	One set in a carton; one dozen sets in a shipping container. 38 lbs.

Bright natural finish. Will fit into any receptacle 9¾" in diameter. Sturdy, rust-proof, detachable handle which fits all three parts. Sturdy rivets. Each pan imprinted Mirro, with Mirro booklet attached.

Bean and Fireless Cooker Pot

No.	B. & S. Gauge	Cap. Qts.	Extreme Diam. In.	Depth In.	Packing
624-M	20	4	7½	6½	One in a carton.

Bright natural finish. Sturdy rivets. Steam escape in cover. Imprinted Mirro, with Mirro booklet attached.



Casserole

No.	B. & S. Gauge	Cap. Qts.	Diam. Bot. In.	Packing and Approximate Shipping Wt.
4977-M	20	2	7⅛	One in a carton; one dozen in a shipping container. 20 lbs.

Polish finish; inside Sun-ray finish. Non-burning, heat-resisting composition knob. Sturdy rivets. Imprinted Mirro, with Mirro booklet attached.
